Two bedrooms on one side with a super large shared bathroom and a very private master on the other side of the house. The master looks out at the pool and shares the same mountain views. Whole house water boiler is brand new. Three 5,000 liter water tanks store enough clean drinking water and water for the garden to last months. 4 air conditioners can be used to keep you cool on the hottest days but on most days just open up the doors to the back yard and let the cool mountain air breezes keep the whole house cool.
